## 3 Hard Disk Installation

(If you needn't to storage, please skip this step)

1 Remove side and tail board screws and take off cover board

2 Turn on power, data line and embed hard disk

3 Using screws to fasten the hard disk and chassis baseplate

4 Aim at card slot, close the cover board and tighten the screws

Recommend using monitoring special hard disk such as Toshiba and so on.

## 4 Connection Diagram

Wireless connection diagram

⚠️ Note: Turn on the power after all lines are connected.

Wired connection diagram

⚠️ Note: There are two types of internet access, you should distinguish them. LAN is just used to connect camera and DVR. You should connect WAN if you want to access outer net.

## 5 Power on Operation

Turn on power :

Turn on power and wait the system start. (Some types has power switch, please close it.)
